DETAILED ACTION

1. This action is responsive to communications: Amendment filed on 03/27/07.

Allowable Subject Matter

2. Claims 1-53 are allowed.
3. Claims 58-63 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach and/or suggest "determining an age linkage data associated with the linked document and ranking the linked document based on a decaying function . . .", combined with "deriving an indication of content update for a linking document . . . adjusting the ranking of the linked document based on the longevity of the linkage data . . .".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2163

5. Claims 54-57 are rejected under 35 U.S.C. 102(e) as being anticipated by Masters, US# 20020198875.

As per claims 54-55, **Masters** teaches “determining an age linkage data associated with the linked document” (see paragraph [0021] and [0032]) “ranking the linked document based on a decaying function of the age of the linkage data” (see paragraph [[0021], [0032] and [0036]).

As per claim 56, **Masters** teaches “anchor text” (see paragraph [0036]-[0037]).

As per claim 57, **Masters** teaches “a rank . . . one or more linking documents . . .” (see paragraph [0017] and [0045]).
